DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the combination of a cleat and a pedal as claimed in claims 7-23 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-23 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent No. 5,522,282 to Nagano (Nagano '282).

Nagano '282 discloses in figures 9-18, a pedal having a device for coupling to a cleat fastened to a shoe, said cleat comprising a front end; a rear end; an upper cam surface; a base; and chamfered lower surface, said device comprising a front element for receiving the front end of said cleat; a rear fastening element for engaging the rear of said cleat having a biasing element; a body surface connecting said front element and said rear fastening element along a longitudinal direction of said pedal; stop means 20a; and cam means 20d located on said body

surface which oppose a releasing rotation of said cleat and which lift a side of said cleat when said cleat is moved away from a center of said pedal. Nagano '282 additionally discloses in lines 23-32 of column 11 that only one cam surface may be provided on said body surface.

Regarding claims 15,16, Nagano '282 additionally discloses in lines 32-38 that the stop means may be provided rearwardly of the pedal body surface.

Response to Arguments

4. Applicant's arguments with respect to claims 1-23 have been considered but are moot in view of the new ground(s) of rejection. Although US Patent No. 5,806,379 to Nagano may not disclose the present invention, US Patent No. 5,522,282 to Nagano does anticipate the present invention.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
